AQUA collection

The time spent in our own pool is your wish. We meet you halfway and we build you a state-of-the-art technology pool with the OSPA German systems. These have a long lifetime and enhanced durability due to using high quality materials for all system components.

You'll say WOW either you see it for the first time or for the 365th time due to the pure water, without chlorine smell, that will cool you every day. The little paradise with fine taste finishing is priced between EUR 25.000 and 45.000.

Breathtaking pool architecture

Advantages and Services included

- ✓ **Counselling and execution**
- ✓ **Automatic sand filtering system, SKIMMER version**
- ✓ **Led lighting: white/RGB**
- ✓ **Automatic Redox treatment system, pH and chlorine, using liquid agents**
- ✓ **Included design finishing**

Benefits

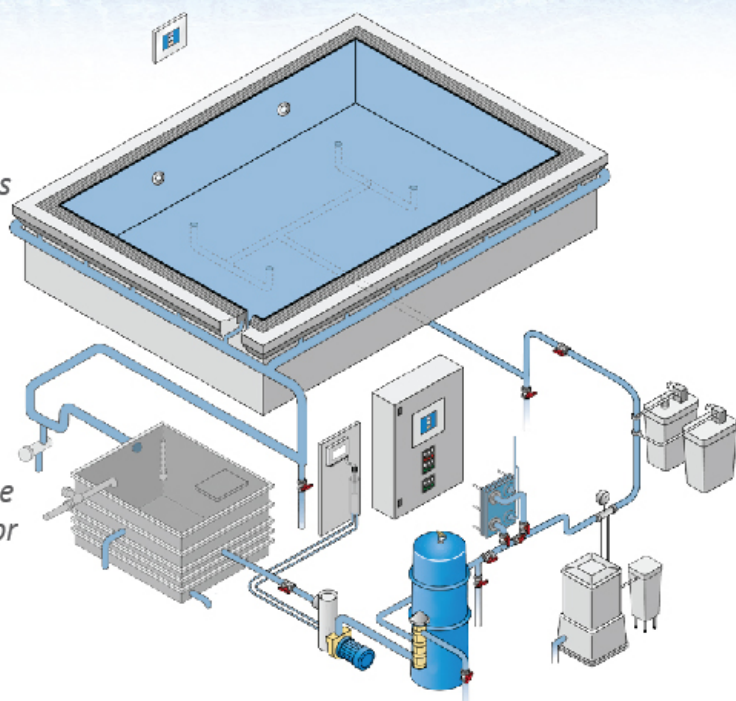

- **Clean limpid water**
- **Easy system use**
- **Robust and long-lasting system**

CONFORT collection

An unique project where the impeccable technical expertise makes possible any aesthetical caprice, for lifetime satisfaction. You get close, feel the water coolness. Jump. And in the second that your body touches the water always surprises you, although it is not your first jump. Your heart beats strongly and you mind empties.

The German systems that are specifically designed for luxury pools will make you say WOW, either you see the pool for the first time or for the 365th time. The design and the elaborately selected finishing bring in your home the pool that we have probably met in the luxury hotel or SPA. The price for this collection varies between EUR 45.000 and 85.000.

Limitless pool architecture

Advantages and Services included

- ✓ **Counselling, project and execution**
- ✓ **OVERFLOW system**
- ✓ **Effective filtering with 2 layers of various grain sand, activated charcoal, automatic filter maintenance. The filtering is automatically controlled depending on use**
- ✓ **Automatic treatment with chlorine, pH and temperature reading**
- ✓ **Power intake and chemical agent optimization**
- ✓ **Complete automation system, plus additional order of three additional systems, such as: lights, waterfall, water games**
- ✓ **5-year warranty (maintenance contract)**
- ✓ **Finishing: glass mosaic, ceramics mosaic or special pool tiles**

Benefits

- **Easy and effortless maintenance of the clean water**
- **No chlorine smell**
- **Automatic filtering system using activated charcoal**
- **Power efficiency**
- **Automatic water treatment system using salt electrolysis**
- **Safe maintenance services**

EXCLUSIVE collection

We bring you the supreme sensory luxury in the heart of your own home, a pool in the shape of your wishes, with crystal water like in Santorini pools. We use high-end generation OSPA German systems, where filtering is completely automated, and the treatment is with 100% natural salt. We bring in your home the supreme comfort that you have already met in the luxury hotels or SPAs!

Premium finishing along with the exclusive design will make you say WOW either you see it for the first time or for the 365th time. You will benefit from clear water just like the spring water, right in your own pool! The price range for the this systems begins from EUR 85.000 and varies depending on the selected finishing and pool size.

Healthy water for the senses

Advantages and Services included

- ✓ **Ultra-performing multilayer sand filtering + activated charcoal, automatic filter maintenance (rinsing + filtering + emptying). Automatic filtering flow based on use.**
- ✓ **Automatic natural treatment through salt electrolysis, and automatic control of the ideal water parameters. Flocculating agent dispensing that enhances filtering efficiency.**
- ✓ **Centralized automation of the entire system with remote data transfer via Internet, with fast and easy control**
- ✓ **The general touch screen control board and the possibility to control all pool equipment, such as: lights, waterfall, automatic tarpaulin, etc**
- ✓ **Touch-screen remote controller that may be located anywhere you wish**
- ✓ **5-year warranty (maintenance contract)**
- ✓ **Included finishing and design**

digital operating system

Benefits

- *Environment protector, delicate to your skin*
- *Easy and real-time information about the system condition and water quality*
- *Easy system operation, even from a PC or Smartphone*
- *Customized design based on your wishes, including landscaping*

EQUIPMENT

OSPA filtering systems

Advanced filtering technology

Benefits

- ✓ Clean water like the well-water due to active coal filtering systems and specialized Ospa technology
- ✓ Low cost due to optimized filtering and controlled speed pumps
- ✓ Low consumption of disinfectant
- ✓ Long lifetime and high durability due to using high quality materials for all system components.

The water is filtered by using sand and active coal.

The automation of the filtering and filter rising processes leads to an enhanced safety in use and comfort.

Enjoy an outstanding quality water, that is friendly to your eyes and skin, a fresh water like the well water, that is rich in oxygen.

The health and pleasure to swim are the most important things we focus on.

Ospa-Filter 10 EcoClean Super

The additional active carbon layer provides for perfect water quality. The speed-controlled, super-quiet whisper pump and the fully automatic Ospa hydro-control valve provide for maximum comfort.

Ultra-performing OSPA German filtering systems for residential pools.

Treatment systems with Ospa BlueClear®

100% natural salt

Benefits

- ✓ Reliable systems due to using the salt as accessible operation resource
- ✓ Due to agents storage is no longer needed, the separated room for water treatment agents disappears
- ✓ The absence of the need to handle chemical disinfectants ensures maximum safety
- ✓ Minimum manpower expenses due to the automatic adjustment through Ospa BlueControl
- ✓ Maximum quality when it comes to natural pool water

OSPA is the ideal path to a healthy water that does not disturb you with unpleasant smells.

The unique water treatment by using the natural salt is the key to a perfect water quality, that even meets the strictest requirements. This coordinated technology errorless ensures the pleasure to swim.

The integrated computer, that is fully automated and power efficient, supplies the water like the well water at a luxury class.

The water temperature, the water values, the climate in the room, the water characteristics, the lights – with Ospa BlueControl, all these are under safe control and are displayed in the pool room.

Ospa BlueClear® unit

Protective disinfection, highest water quality:
Ospa chlorozone® units provide for perfect hygiene in private swimming pools, both indoors and outdoors.

Ultra-performing OSPA German filtering systems for residential pools.

Digital operation system

The solution for professionals

Wireless technology

Benefits

- ✓ Automatic adjustment of the chlorine level, pH, Redox potential and monitoring the water temperature
- ✓ Constant high quality water
- ✓ Touch screen interface control with manifold submenus for system configuration
- ✓ Chlorine level potentiometer-type stabilizer and measurement system with 3 electrodes
- ✓ Ready for connection and inspected in the production

The intelligent Ospa-BlueControl system controls and monitors all pool functionalities. This innovative technology ensures a low power consumption and the water values will always be optimum.

Water recirculation, pool water temperature, room climate or lights - this control board combines all functionalities in a single device. It controls, adjusts and measures everything related to your pool via touch screen for maximum comfort and security.

Maximum comfort with digital operation system

Ultra-performing OSPA German adjustment, control and monitoring systems for residential pools.

Other filtering & treatment systems

Filtering systems for private pools

For clean and limpid water

Sand filter with pressure gauge that indicates when it requires backwash. The window shows us when the water is clear and clean.

Valve with 6 positions for operation.

- Discharge valve
- 6-position valve
- Pressure gauge
- Side window for monitoring the filtering layer during operation

Compact treatment systems

for residential pools

Maximum accuracy for your pool

Complete high precision equipment for controlling and dispensing treatment agents, it contains reading sensors, CL-free and Ph. The pumps are with proportional agents dosing, as to keep constant the set-up level of chemicals, having an optimum consumption.

Data display on the screen, user-friendly menu and the analysis camera with reading sensors build-up a safe and robust system.

*The system is provided with treatment agent tanks and all materials needed to install and commission the **MiniMaster** system. It is available in many versions as to perfectly match all types of pools.*

The equipment makes all the work that you would have to do to dose-up the chemical agents and to measure the water parameters as to keep the water clean and limpid.

Ultra-performing filtering systems for residential pools.

Filtering systems for public pools

Professional water treatment systems

Benefits of the professional water filtering systems, perfect for public pools.

- Professional filtering
- High resistance in time
- Low maintenance cost
- Three layers of sand
- 5-year warranty
- Easy to carry and handle
- Multilayer filtering mediums (activated coal, hydro-anthracite, activated glass)

“ *The water really becomes crystal-clear with the proper filter.* ”

Treatment and control systems for public pools

Professional treatment and control system

Benefits of the professional water treatment and control systems, perfect for public pools.

- Simultaneously control of up to 16 volumes of water
- Accurate measurement of the chlorine, redox, free chlorine, total chlorine, combined chlorine, temperature
- Real-time data transfer
- Parameter level long-term data recording
- Reliable dosing system
- Transfer via Internet of all data related to the water and filtering system condition
- Remote control, through any Internet-connected device, of the pool filtering and treatment system functionalities (temperature adjustment, water parameter settings, filter washing, pool discharge, lights actuation etc.).

Ultra-performing filtering, treatment and control systems for public pools.

ACCESSORIES

Waterfall and water cannon

For a SPA at your home

The waterfall is a water curtain that creates an exquisite visual appearance, also having a therapeutic anti-stress role, that gives a relaxation feeling due to application of a cervical massage.

“ *For public and residential pools.*

Upstream device

The perfect tool for training or fun

With a motor output of 2,2 Kw and a flow jet of 54 mc/h, the swimming training and the balanced muscle formation are done very easily, by simply pressing the front button.

The jet power is variable and may be adjusted from the central board. The jet resistance could be changed between three distinct gears, two for the water jet and one for the air mixing.

Optional systems, for public and residential pools.

Pool lights

Stainless steel premium accessories for your pool

The lights system consists of 3 underwater headlights with RGB 35 W LEDs, transformers, cables, safety devices.

The lights are remotely controlled by a remote controller that could also be used to control another optional equipment, such as: upstream swimming devices or waterfall control.

“*For a pleasant ambient and possibility of use 24 hours out of 24.*

Heat exchanger

For fast and flexible heating

The water heating is performed by a tubular coiled heat exchanger, made of stainless steel AISI 316L, resistant to corrosive environment, and suitable for systems operating under pressure.

Easy to install with an adjustable stainless steel system for clamping and fixing.

For salty water pools, heat exchangers made of special materials, that are resistant in the salty environment, must be used.

“*Simply to install on the existing heat pump*

Optional systems, for public and residential pools.

FINISHING

Mosaic

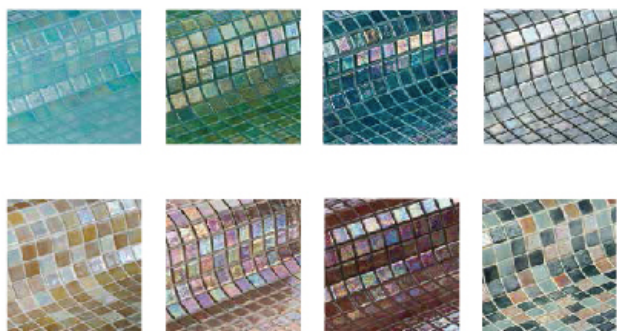

A plus of luxury for your pool

The mosaic gives the pools and unique design, pleasant to the eye, being recommended in particular for the indoor pools. A very high quality mosaic gives time-resistance and a nice appearance, having a variety of colours, depending on your wishes.

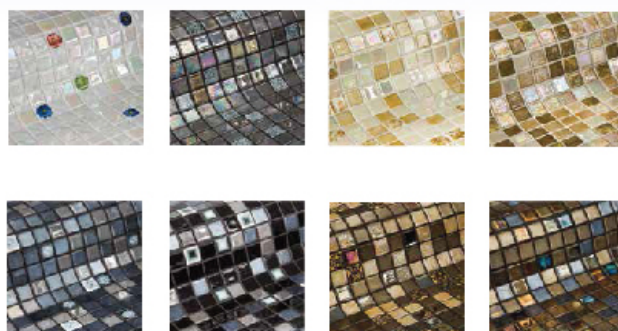

The materials used for pool plating and waterproofing (adhesives, putty, membranes) are of the highest quality, very efficient and time resistant.

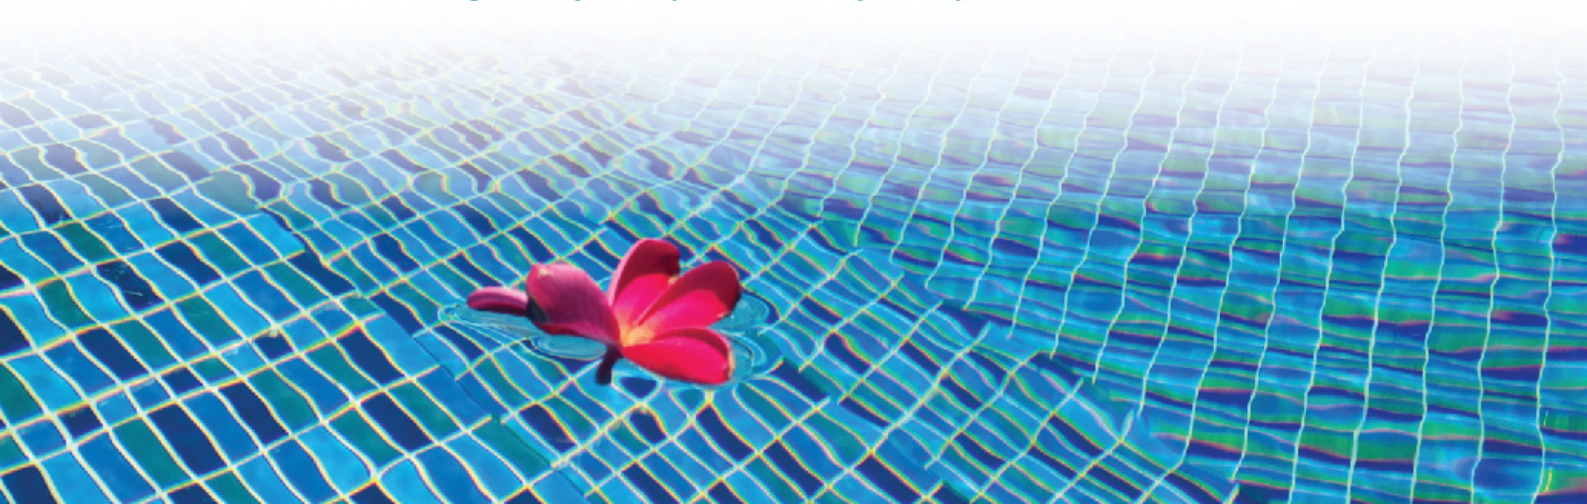

IRIS Collection

COCKTAIL Collection

“ Transform your pool into your personal Paradise.

High quality mosaic plating for public and residential pools.

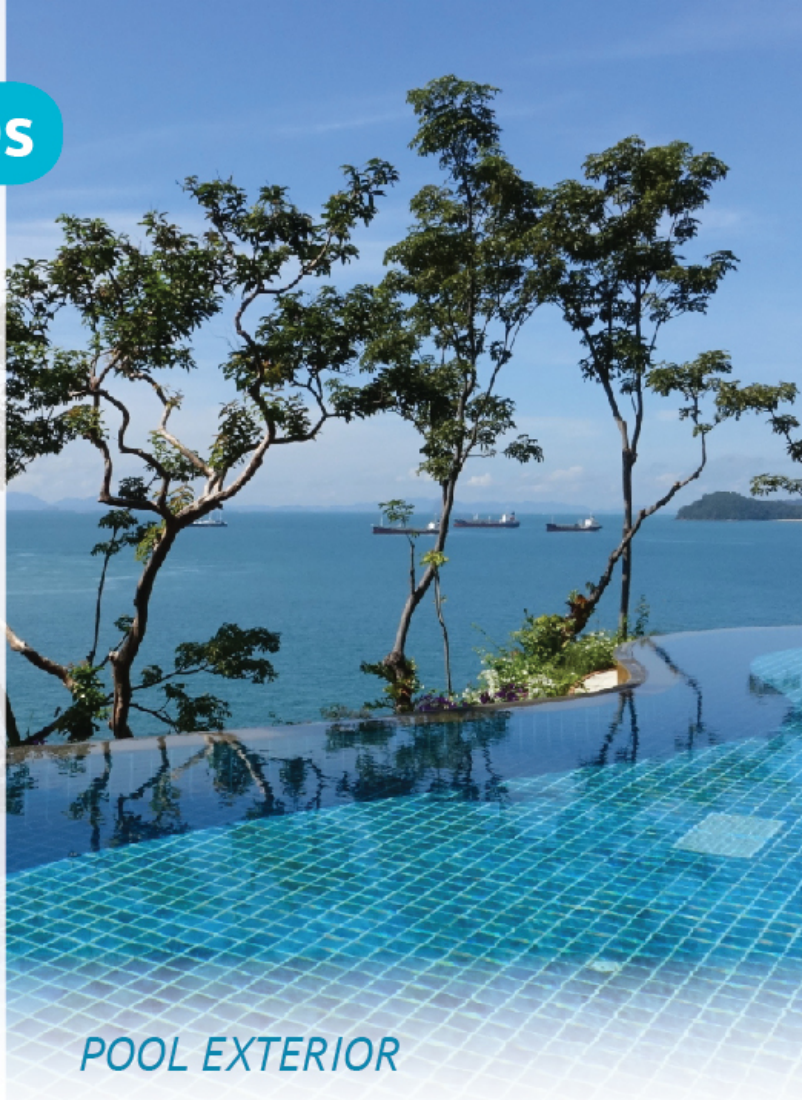

Special sandstone tiles

Elegant and reliable solution for any pool

The special sandstone tiles are frequently used to finish outdoor pools, with a greater resistance in time.

The pool finishing could consist of more than one sandstone shades, according to a certain design, giving it an unique personality.

The materials used for pool plating and waterproofing (adhesives, putty, membranes) are of the highest quality, very efficient and time resistant.

POOL INTERIOR

POOL EXTERIOR

“Ensured durability without any aesthetical compromise.
